DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 4/23/03 to overcome the patented number US 6,367,213 has been reviewed and recorded. However, the new art and new ground of rejection are presented as following:

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 6-13, 15, 16, and 52, 54 are rejected under 35 U.S.C. 102(e) as being anticipated by Miedema (U.S. 6,260,320).

Miedema shows in figs. 1-3 a utility panel system 10, comprising a rigid frame assembly 24, 71, free stands 23, a plurality of top, intermediate, and bottom brackets 101, 101', 64 (fig. 3) mounting on the rigid frame 71, a pair of top, bottom facing panels

Art Unit: 3635

assembly 97, 98 (fig. 2), means for mounting the facing panel assembly or mounting clips 99-1, 99-2, wherein an unobstructed cavity 122 are defined between the inward facing back surface of the upper panel 97 and the outward facing exterior surfaces of the extension posts 24 which upper spaces 122 generally are defined along the vertical length of each respective extension post 24. The unobstructed cavity 122, therefore, permit passage of the cabling 81 as well as the horizontal flex connectors 82 horizontally across the extension post 24 and along the entire length of the wall panel system 10, and a crown member 12 on the top of the panel assembly (col. 11, lines 60-end, col. 12, lines 1-2, fig. 15).

Allowable Subject Matter

3. Claims 17-18 and 55-56 are previously allowed.

The following is an examiner's statement of reasons for allowance: The prior art fail to disclose or render obvious the claimed combination including the crown member having an upper, lower angled, an inclined clamping surface, an up-mount and down bracket as specifically set forth in the claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 2, 6-13, 15-16, and 52, 54 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3635

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
